

Ruslan Plastun

Back End Developer

zaharzagrava@gmail.com

SUMMARY

- Node.js developer with 3 years of professional experience, and 10+ projects
- Mainly specialize in Node.js / Typescript / PostgreSQL / AWS
- Currently tech lead / guru of the BE part of the financial services kit - multiple services, complicated functionality, automated testing
- Can work with React.js, GraphQL, Elasticsearch, Terraform, Redis, CI/CD setup, many third-party APIs etc.

WORK EXPERIENCE

Back End Developer

Jan 2022 - Present

AgileEngine

FinKit (multiple projects, services)

- Acted as a tech lead: managed groomings, planned tasks and feature development, reviewed PRs, ensured code quality and security, updated and maintained common code, managed project documentation (Feature Planning, Task Grooming, Communicating Best Practices, Managing Project Documentation, Automated Testing, PR Reviews, Ensuring Code Quality)
- Investigated and implemented a Firebase authentication system that is used across multiple API services (Nest.js, Firebase, GCP, Typescript, Firebase)
- Implemented a secure authentication system for the service that managed sensitive data (PostgreSQL, Nest.js, Typescript)
- Developed and managed complex permission system with filtering by multiple criteria, optimized it to be run in least amount of SQL queries and time (PostgreSQL, Nest.js, Automated Testing)
- Participated and developed multiple API services in an even bigger service architecture: some of them I developed alone, some of them as part of a bigger team, switching between projects on a day-to-day basis, managing increasing code complexity, improving code quality and development processes (PostgreSQL, Nest.js, Typescript, Feature Planning, Node.js, AWS, Sequelize)

Back End Developer

Jul 2021 - Jan 2022

Titanium Technologies

Alty <https://alty.com/>

- Moving the project with 4+ developers, 3 websites, 1 core api and 2 adapters (one for telegram, one for whatsapp) forward with new features (Node.js, MySQL, AWS, Redis, Gitlab, Express.js, Javascript, Sequelize, PR Reviews)

Diversifi <https://diversi.fi/>

- Combined two separate APIs (old one on JS, and new one on TS / Nest.js) into one (Node.js, Typescript, Javascript, PostgreSQL, Nest.js, Redis, Gitlab, Express.js, Terraform)

- Developing new features along the way. (Node.js, Typescript, Javascript, PostgreSQL, Nest.js, AWS, Redis, Gitlab, Express.js, Terraform, PR Reviews, Sequelize)
- Working with clients through Google Meetings and chat, as well as collaborating with English-speaking developers (English)

Tech Lead

Apr 2021 - Jul 2021

Milestone

LiveWell Home <https://mylivewellhome.com/>

- Implemented complete backend and frontend functionality for the project (login, registration, profile editing, services creation (through admin panel), services dashboard, change password etc.) (GraphQL, PostgreSQL, Typescript, Node.js, Express.js, styled-components, React.js, Redis, AWS)
- Created role-based access to different endpoints. For example, only admins can get a list of users, but everyone can get a list of service providers (Node.js, Express.js, Typescript)
- Deployed project on AWS using AWS Cloudformation complying with security requirements for deployed resources like AWS RDS and S3 (AWS, AWS Cloudformation)
- Created fully automated CI/CD pipeline using CircleCI. (CircleCI)
- Working directly with clients from the US through Google Meetings and chat, discussing the development process (English)

Full Stack Developer

Oct 2020 - Mar 2021

Milestone

Meetmeinthebar <https://meetmeinthe.bar>

- Refactored API codebase, increasing its maintainability, and preserving performance of the project (Node.js, React.js, React Native, Javascript, Redis, PostgreSQL, Digital Ocean, Redux, Express.js, Sequelize)
- Had experience in writing unit / integration tests for react / react-native using jest and react-testing-library (Node.js, React.js, Typescript, Javascript, Redux, Automated Testing)
- Was responsible for code review, and for maintaining the quality of the existing codebase (Node.js, React.js, React Native, Typescript, Javascript, PostgreSQL, Digital Ocean, Redis, Redux, SASS, Express.js, Elasticsearch, Ensuring Code Quality, PR Reviews)
